FEDERAL MILK ORDER MARKET STATISTICS

JUNE HIGHLIGHTS

MINIMUM CLASS I PRICE, \$10.75; BLEND, \$9.55

PRODUCER DELIVERIES UP 1.3 PERCENT

PRODUCER MILK USED IN CLASS I UP 1.4 PERCENT

49 PERCENT OF DELIVERIES USED IN CLASS I

IN-AREA FLUID MILK SALES (ADJUSTED) UP 1.6 PERCENT

AGRICULTURAL MARKETING SERVICE
DAIRY DIVISION
WASHINGTON, D.C.

ISSUED - August 1977

FMOS - 210

TABLE OF CONTENTS

<u>Table No.</u>	<u>Page No.</u>
Summary.	3
1. Federal order fluid differentials, July and August 1977; minimum Class I prices for milk of 3.5 percent butterfat content f.o.b. market or other indicated point, and butterfat differentials, July 1976 and 1977 and Class I price, August 1976 and 1977.	7
2. Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, June.	8
3. Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, January - June averages.	10
4. Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, June.	12
5. Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal orders, June	14
6. Producer milk deliveries used in Class II by handlers regulated under Federal orders which have three classes of utilization, June and year to date with comparisons	16
7. Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I, January-June	18
8. Whole milk, lowfat and skim milk items sold in marketing areas defined by Federal milk orders, for markets where such information is available, May 1977, with comparisons.	20
9. Packaged sales of individual whole milk items, lowfat and skim milk items, in 46 selected marketing areas defined by Federal milk orders, January 1977 to date, with comparisons	22
10. Packaged sales of whole milk items, lowfat and skim milk items, milk and cream mixtures, cream items, and total fluid items by handlers regulated under Federal milk orders, grouped by region, May 1977, with comparisons	24
11. Packaged sales of milk and cream mixtures, cream items, yogurt, and eggnog by handlers regulated under Federal orders, January 1977 to date, with comparisons	25
12. Milk, skim milk and cream utilized in the manufacture of dairy products by handlers regulated under Federal milk orders, grouped by regions, May 1976.	26
13. Milk, skim milk and cream utilized in the manufacture of dairy products by handlers regulated under Federal milk orders, grouped by regions, May 1977.	27
14. Percentage of whole milk equivalent used in the production of manufactured dairy products, in Federal order markets, January 1977 to date, with comparisons.	28
15. Federal order base and excess prices for milk of 3.5 percent butterfat content, June	29
16. Seasonal incentive fund excluded under various Federal milk orders, June	29
17. Dairy product prices and manufacturing milk prices, January 1977 to date, with comparisons	30
18. U.S. milk prices, U.S. milk feed ratio, and general price measures, January 1977 to date, with comparisons	31
19. Retail prices paid by consumers for dairy products, United States, January 1977 to date, with comparisons	32
20. Prevailing prices paid by consumers for the most common grade of whole milk, skim milk, ice cream, cheese, American process, and butter, 23 cities, June 1977, with comparisons.	32
21. U.S. production, January 1977 to date with comparisons	33
22. Commercial and Government storage holdings, January 1977 to date, with comparisons	33
23. U.S.D.A. purchases (Delivery basis), January 1977 to date, with comparisons.	34

1/ Total packaged disposition, in and out of the marketing area, by regulated handlers. Besides receipts from producers, these dispositions also may include receipts from other Federal order plants and/or receipts from other sources.

2/ Plain and flavored whole milk.

3/ Plain, fortified, flavored skim and lowfat milk, and buttermilk.

4/ Light, heavy, and sour cream, and cream dips.

5/ Includes eggnog and yogurt.

6/ Data for February 1976 adjusted to a 28-day basis before computing percentage changes.

7/ During January 1974, there was a change in the reporting of the sales of cream items. As a result, the percent change over the previous year is somewhat overstated.

8/ Represents the data for all Federal milk order markets, except New York-New Jersey. Data for comparable Federal milk order markets can be found on tables 10 and 11.

9/ The decreased number of comparable markets reflects the merger of Cedar Rapids-Iowa City, Des Moines, Quad Cities-Dubuque, and North Central Iowa. See "Major Order Actions, May 1977" in FMOS - 209, May 1977.

1/ Includes producer milk and some other source milk used to produce manufactured dairy products in regulated pool plants as well as milk diverted and shipped to non-order plants for processing. Some data are partially estimated.

2/ Includes, in addition to listed manufactured products, milk, skim milk, and cream used in other manufactured products, i.e. evaporated milk, condensed milk, whole milk powder, aerated, and frozen and plastic cream; and, milk, skim milk, and cream used in food products as well as used in animal feed, dumped or spilled, plant loss and unidentified.

3/ Percentage changes over previous year are based on pounds of butterfat, except for skim milk powder which are based on pounds of product.

4/ Data for February 1976 adjusted to a 28-day basis before computing percentage changes.

5/ Excludes New York-New Jersey.

6/ The decreased number of markets reflects the merger of Cedar Rapids-Iowa City, North Central Iowa, Quad Cities-Dubuque, and Des Moines. See "Major Order Actions, May 1977 in FMOS - 209, May 1977.

1/ In-area sales represent total sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handler in-area sales are partially estimated.

2/ Plain, and flavored whole milk.

3/ Plain, fortified, and flavored skdm and lowfat milk, and buttermilk.

4/ Percentages based on the same number of comparable markets in both years. Data for February 1976 adjusted to a 28-day basis before computing percentage changes.

5/ Adjusted to eliminate variations in data due to calendar composition and seasonality. See special article in this issue, page 35.

6/ Excludes the New York-New Jersey, Fort Smith, Lake Mead, Western Colorado, and Mississippi markets.

7/ Excludes the New York-New Jersey market.

8/ Excludes the New York-New Jersey and New Orleans-Mississippi markets.

9/ The decreased number of comparable markets reflects the merger of Cedar Rapids-Iowa City, Des Moines, Quad Cities-Dubuque, and North Central Iowa. See "Major Order Actions, May 1977" in FMOS - 209, May 1977.

10/ Estimated.

Table 1.—Federal order fluid differentials, July and August 1977; minimum Class I prices for milk of 3.5 percent butterfat content f.o.b. market or other indicated point* and butterfat differentials, July 1976 and 1977; and Class I price, August 1976 and 1977

* Generally the major city in the marketing area. See footnotes on table 2 for location.

1/ The basic formula price is the Minnesota-Wisconsin price for the second preceding month adjusted to a 3.5 percent butterfat content.

2/ Tied to the St. Louis-Osarks order.

3/ Effective May 1, 1977 the North Central Iowa, Cedar Rapids-Iowa City, Quad Cities-Dubuque, and Des Moines markets were merged to form Iowa.

The data shown for the previous year represent what the prices would have been had the order been in effect at those times.

4/ Tied to the Oklahoma Metropolitan order.

5/ The data shown for the previous year represent what the prices would have been had the order been in effect at those times.

* Major city in the marketing area. ** All averages are weighted. 1/ Nearby plant zone prices; Boston and Hartford are in this zone. Price at 201-210 mile zone; Class I and blend, 40 cents less; Class II, 5.8 cents less. 2/ Markets under regulation on January 1, 1977, and which have had no significant marketing area expansions. Excludes Upper Midwest, Iowa, Tennessee Valley, Greater Louisiana, and New Orleans-Mississippi. 3/ New York metropolitan area. Price excludes a 5-cent direct delivery differential. Prices at 201-210 mile zone: Class I and blend, 24 cents less; Class II, eight cents less. 4/ Philadelphia, Baltimore, and Washington, D.C. Price excludes a 6-cent direct delivery differential applicable to milk delivered to Philadelphia. 5/ Blend price excludes a 7-cent deduction for the advertising and promotion program. 6/ Miami. 7/ Applies to the skim milk portion of all milk which is either disposed of for fertilizer or livestock feed or dumped. 8/ Jacksonville and Tallahassee. 9/ Atlanta. 10/ Detroit. Price excludes an 8-cent direct delivery differential applicable to milk delivered to Detroit. 11/ Zone I (Erie, Pennsylvania). Class I and blend price for zone 3 (Cleveland) plus 8 cents, for zone 4 (Pittsburgh) plus ten cents. 12/ Blend price excludes a 5-cent deduction for the advertising and promotion program. 13/ Central zone (Cincinnati and Columbus). Class I and blend price at Toledo (Northwestern zone) five cents less and at Charleston, West Virginia (Southeastern zone) 5 cents more. 14/ Zone 2 (Marquette). 15/ Weighted average of all handlers' blend prices at all locations, 1977-76. 16/ Zone I (Chicago). Class I and blend price at Milwaukee (Zone 4) 6 cents less. 17/ Indianapolis. 18/ Bass zone (Alton). Class I and blend price at Carbondale (southeastern zone) seven cents more. 19/ Peoria. 20/ Zone I (Minneapolis, Rochester, and Duluth, Minnesota; Fargo, North Dakota, and Superior, Wisconsin). 21/ Represents a weighted average price for the merged orders. 22/ Sioux Falls. 23/ Rapid City, South Dakota. 24/ Zone I (Des Moines). Class I prices at other points in the marketing area are: Cedar Rapids, minus seven cents; Rock Island, IL., minus seven cents; and Waterloo, minus 16 cents. 25/ Zone I (Omaha).

* All averages are weighted.

1/ See footnotes on table 2 for location at which price is reported.

2/ For the period January through March 1976 the prices represent weighted averages for the two merged markets.

3/ Based on markets where orders were effective entire period, 1976-77, and which have had no significant marketing area expansions. Excludes Upper Midwest, Iowa, Tennessee Valley, Greater Louisiana, and New Orleans-Mississippi.

4/ For the period January-May 1976, the prices represent weighted averages for the four merged markets.

5/ For the periods January-April 1977 and January to date 1976, the prices represent weighted averages for the four merged markets.

6/ For the period January-June 1976, the prices represent weighted averages for the three merged markets.

7/ Excludes Fort Smith. Fewer than three handlers.

* Year to date.

1/ Excludes Southeastern Florida; Class III only applies to the skim milk portion of all milk disposed of for fertilizer or livestock feed or dumped.

2/ The cumulative data for the period January-May 1976 represent the summation of the four orders merged to form Upper Midwest.

3/ The data for June 1976, January-June 1976, and January-May 1977, represent the summation of the four orders merged to form Iowa.

4/ The monthly and cumulative data for the previous year represent Chattanooga. Appalachian and Knoxville had only two classes.

5/ The data for the Central Arkansas and Fort Smith markets have been combined in order to mask restricted data.

1/ In-area sales represent total sales in each of the areas by handlers regulated under the respective orders, by handlers regulated under other orders, by partially regulated handlers, and by producer-handlers. Sales routes of handlers may extend outside defined marketing areas; therefore, some handler in-area sales are partially estimated.

2/ Plain and flavored whole milk.

3/ Plain, fortified and flavored skim and lowfat milk and buttermilk.

4/ Data for February 1976 adjusted to a 28-day basis before computing percentage changes.

5/ Sales represent the marketing area after the merger of Boston Regional and Connecticut, April 1, 1976.

6/ Represent combined sales for Duluth-Superior, Minneapolis-St. Paul, Minnesota-North Dakota, and Southeastern Minnesota-Northern Iowa, after the merger and expansion of June 1, 1976. Some data are estimated.

7/ Sales represent the marketing area after the expansion of Greater Louisiana and New Orleans-Mississippi, April 1, 1976; and Eastern South Dakota, June 1, 1976. Some data are estimated.

8/ Represents combined sales for North Central Iowa, Cedar Rapids-Iowa City, Quad Cities-Dubuque and Des Moines prior to the merger and expansion of May 1, 1977. Some data are estimated.

9/ Represents combined sales for Appalachian, Knoxville, and Chattanooga, after the merger and expansion of October 1976. Some data are estimated.

10/ Figures adjusted to eliminate variations due to calendar composition. See special article in this issue, page 35.

11/ Small amount of sales estimated.

1/ TOTAL PACKAGED DISPOSITION, IN AND OUT OF THE MARKETING AREA, BY REGULATED HANDLERS.

2/ SEE PAGE 7 FOR MARKETS INCLUDED IN EACH REGION. MIDDLE ATLANTIC EXCLUDES NEW YORK-NEW JERSEY. THIS MARKET IS ALSO EXCLUDED FROM THE TOTAL.

3/ PLAIN AND FLAVORED WHOLE MILK.

4/ PLAIN, FORTIFIED, AND FLAVORED SKIM AND LOWFAT MILK, AND BUTTERMILK.

5/ LIGHT, HEAVY, AND SOUR CREAM, AND CREAM DIPS.

6/ INCLUDES YOGURT AND EGNOG.

7/ PERCENTAGE CHANGES OVER THE PREVIOUS YEAR ARE BASED ON THE SAME NUMBER OF COMPARABLE MARKETS. AS A RESULT, WEST NORTH CENTRAL EXCLUDES THE UPPER MIDWEST MARKET, EAST SOUTH CENTRAL EXCLUDES THE TENNESSEE VALLEY MARKET, AND WEST SOUTH CENTRAL EXCLUDES THE GREATER LOUISIANA AND NEW ORLEANS-MISSISSIPPI MARKETS. THESE MARKETS ALSO ARE EXCLUDED FROM THE TOTAL PERCENTAGE CHANGE.

Table 11.—Packaged sales of milk and cream mixtures, cream items, yogurt, and eggnog by handlers regulated under Federal order markets, for those markets where comparable data are available, January 1977 to date, with comparisons 1/

Adjusting In-Area Sales Data for Calendar Composition*

The trend in sales of fluid milk products is one of the more important statistics used to assess the current dairy situation. Tables 8 and 9 of this publication present sales of whole milk items, lowfat and skim milk items, and the total of these in marketing areas as geographically defined by each Federal milk order market. These sales figures reflect not only variation due to trend, but also variations due to seasonality, calendar composition, and randomness. The effect of seasonality is minimized by comparing monthly data for the current year with the same month of the previous year. Since the adjustment process described in this article removes most of the variation due to calendar composition, the adjusted sales data generated by this process can be used to measure trend.

Variation in sales data due to calendar composition results because the number of the types of days—Sundays, Mondays, etc.—that occur in a particular month vary from year to year. For example, in 1976, January had five Thursdays, Fridays, and Saturdays whereas, in 1977, January had five Saturdays, Sundays, and Mondays. In comparing the two months, 1976 had an extra Thursday and 1977 had an extra Monday. Since there is daily variation in fluid milk sales data, sales in January 1976 can be expected to be different than sales in January 1977, because sales on Thursdays are different than sales on Mondays.

Therefore, the key to accounting for monthly calendar variation in fluid milk sales lies in estimating day-to-day variation during the week. A procedure called the 31-30 Day Difference Method was used to develop a set of daily weights which eliminate most of the variation due to calendar composition. 1/ These weights are shown in table A.

Table A.—Index of daily variation in weekly in-area sales

<u>Days</u>	<u>Index</u>		
	<u>Whole Milk Items</u>	<u>Lowfat and Skim Milk Items</u>	<u>Total Fluid Milk Items</u>
Sunday	0.0731	-0.0606	0.0511
Monday	1.1939	1.2607	1.1985
Tuesday	1.0586	1.0677	1.0761
Wednesday	1.0080	0.8912	0.9810
Thursday	1.1469	1.1154	1.1284
Friday	1.2812	1.3997	1.3207
Saturday	1.2383	1.3259	1.2442

These indices show how sales on a particular day of the week compare to an average sales day. For example, sales of whole milk items on a Sunday are 7.31 percent of an average sales day whereas sales on a Friday are 128.12 percent of an average sales day.

Monthly Adjustment Factors

To derive factors for adjusting monthly data, the sum of the daily weights for each type of month ^{2/} was divided by the number of days in that month. For example, a 31-day month beginning on a Sunday has a total weight of 30.2678 for lowfat and skim milk items which, when divided by 31.0, yields an adjustment factor of 0.9764. The adjustment factors for the other types of months are shown in table B.

Table B.—Factors for Adjusting Monthly In-Area Sales for Variations Due to Calendar Composition

Adjusting Factors

First day of month	Whole Milk Items		Lowfat and Skim Milk Items		Total Fluid Milk Items	
	31-day	30-day	31-day	30-day	31-day	30-day
	months	months	months	months	months	months
Sunday	0.9782	0.9756	0.9764	0.9733	0.9782	0.9750
Monday	1.0084	1.0084	1.0071	1.0110	1.0082	1.0092
Tuesday	1.0069	1.0022	1.0024	.9986	1.0060	1.0019
Wednesday	1.0141	1.0052	1.0131	1.0002	1.0139	1.0036
Thursday	1.0215	1.0143	1.0271	1.0172	1.0224	1.0150
Friday	.9869	1.0173	.9892	1.0242	.9876	1.0188
Saturday	.9840	.9770	.9847	.9755	.9837	.9765

The adjustment factor for all 28-day Februaries is 1.0000. ^{2/}

These adjustment factors reflect how sales in a particular type of month compare to sales in a month in which all the days are average sales days. For example, since the adjustment factor for a 31-day month beginning on a Sunday for total fluid milk items is 0.9782, sales of these items during such a month are lower than during an average-sales-day month. Therefore, sales during such a month need to be adjusted upward before comparisons to a previous year can be made on a comparable basis. Monthly in-area sales are adjusted to a comparable year-to-year basis by dividing the reported sales by the respective adjustment factor. Table C provides a convenient means of finding the factor applicable to any specific month from 1976-78. Table C is shown on the next page.

A word of caution: The daily weights and the monthly adjustment factors derived from them were based on in-area sales of whole milk items, lowfat and skim milk items, and the total of these in the combined marketing areas. They are intended to apply only to combined market sales data. They may not be the best weights and adjustment factors to apply to individual market data or to individual products.

An explanation of the 31-30 Day Difference Method and an evaluation of the weights obtained are contained in an informal Dairy Division report entitled "Adjusting In-Area Fluid Milk Sales Data for Calendar Composition". You can obtain a copy of this report by writing to the Chief, Market Information Branch, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, DC 20250.

Comparing Sales in Different Months

A further application of calendar composition adjustment factors is in comparing in-area sales in different months of the same or different years. To accomplish this, it is necessary to employ seasonal indexes as well as calendar composition adjustment factors. Such indexes based on seasonal patterns of the last 14 years are given in table D. These seasonal indices are shown two ways: (1) based on daily average sales, which presents a truer depiction of seasonal variations, and (2) based on total sales, which takes into account the number of days in the month.

Table D.—Seasonal Indexes of In-Area Sales of Whole Milk Items, Lowfat and Skim Milk Items, and the Total of These, based on Data for 1963 through 1976

Month	: Whole Milk		:: Lowfat and Skim		:: Total Fluid	
	: Items		:: Milk Items		:: Milk Items	
	: Daily Avg.	Total	: Daily Avg.	Total	: Daily Avg.	Total
	: Sales	Sales	: Sales	Sales	: Sales	Sales
January	1.0403	1.0605	1.0229	1.0428	1.0374	1.0576
February	1.0380	.9558	1.0329	.9511	1.0375	.9554
March	1.0288	1.0488	1.0342	1.0544	1.0300	1.0501
April	1.0143	1.0007	1.0256	1.0118	1.0167	1.0031
May	.9853	1.0045	.9911	1.0104	.9860	1.0052
June	.9157	.9034	.9630	.9501	.9247	.9123

September	1.0331	1.0192	1.0024	.9889	1.0270	1.0133
October	1.0519	1.0723	1.0215	1.0414	1.0460	1.0664
November	1.0366	1.0227	1.0096	.9960	1.0315	1.0177
December	1.0139	1.0341	.9920	1.0113	1.0102	1.0298

In order to compare sales in two different months of the same or different years, it is necessary to divide the sales figures by the respective seasonal factors and then by the appropriate calendar composition factors. The two adjusted sales figures can then be compared directly and any difference would reflect only the effects of trend and random variation.

For example, how do January 1977 in-area sales of total fluid milk items compare with sales of these items in April 1977? The procedure is as follows:

(1) For January 1977:

- a. divide in-area sales by the January seasonal factor
 $3,020 \div 1.0576 = 2,856$ million pounds
- b. divide by the January 1977 calendar composition factor
 $2,856 \div 0.9837 = 2,903$ million pounds

(2) For April 1977:

- a. divide in-area sales by the April seasonal factor
 $2,914 \div 1.0031 = 2,905$ million pounds
- b. divide by the April 1977 calendar composition factor
 $2,905 \div 1.0188 = 2,851$ million pounds

Comparing the adjusted sales figures for January 1977, 2,903 million pounds, to the adjusted figure for April 1977, 2851 million pounds, indicated a downward trend between the two months.

A word of caution: The seasonal indexes, like the monthly adjustment factors, are based on in-area sales for combined markets and may not be the best index to apply to individual market data or to individual products within the groups. Also the procedure for comparing sales is only applicable to sales for the same group of markets.

* Prepared by John P. Rourke, Agricultural Economist, Market Information Branch, Dairy Division, Agricultural Marketing Service.

1/ See FMOS-134, issued April 1971.

2/ The type of month can vary depending on which day the month begins and how many days are in the month.

3/ The above factors may be applied either to total monthly sales or daily average sales.

Fluid Milk Processing Plants Owned by Cooperatives in Federal Milk Order
Marketing Areas*

Many cooperatives are involved in the processing of milk into manufactured dairy products. Fluid milk processing operations owned and operated by cooperatives are less widespread. Recently, information was compiled concerning cooperative activity in processing fluid milk products under Federal milk orders.

Handlers regulated under Federal orders process approximately two-thirds of all fluid milk products sold in the United States. During March 1977, there were 934 fluid milk processing plants regulated under Federal orders with a combined monthly output of over 3,719 million pounds of fluid milk products.^{1/} In March 1977, cooperatives owned 83 fluid milk processing plants regulated under Federal orders (8.9 percent of the total regulated fluid milk processing plants). These 83 plants processed a combined total of more than 476 million pounds during the month (12.8 percent of total fluid milk products processed in regulated plants). See table 1.

Highlights of this survey of cooperative-owned fluid milk processing plants, for March 1977, are:

(1) The degree of cooperative activity in fluid milk processing varied widely from market to market. In 17 markets, cooperatives processed no fluid milk products. At the other extreme, in two marketing areas cooperatives processed more than 90 percent of total fluid milk products. In 33 of 50 Federal order markets, cooperatives processed 20 percent or less of the fluid milk products. In seven markets, cooperatives processed more than half of the fluid milk products. See table 2.

(2) On the average, cooperative-owned plants process larger volumes than proprietary plants. Cooperative-owned plants produced a monthly average of 5.7 million pounds of fluid milk products, compared to an all plant average of 4.0 million pounds. See table 3.

(3) Cooperative-owned fluid milk processing plants ranged in size from very small (the smallest reported cooperative processing plant produced about 50,000 pounds of product per month) to quite large (producing over 25,000,000 pounds per month).

(4) A total of 40 cooperatives operated fluid milk processing plants under Federal orders. Twelve cooperatives owned and operated more than one such plant. Four cooperatives each processed more than 40 million pounds of fluid milk products in Federal orders during March 1977. Seventeen cooperatives each processed less than five million pounds of fluid milk products during the month in regulated plants. See tables 4 and 5.

^{1/} For detailed information on number and size of fluid milk processing plants in Federal orders during December 1975, see FMOS-208, April 1977.

*Prepared by Howard D. Leathers, Agricultural Economist, Market Information Branch, Dairy Division, Agricultural Marketing Service.

Total	40*	83	934	8.9	476,118	3,719,066	12.8

Note: For the purpose of this survey, "fluid milk products" include packaged whole milk items, lowfat and skim milk items, cream items, eggnog, and yogurt.

* Regional numbers do not add to total because some cooperatives operate plants in more than one region.

Table 2. - Frequency distribution of the percent of fluid milk products processed in cooperative-owned plants, March 1977

Percent of fluid milk products processed in cooperative plants	:	Number of markets
90.1 - 100.0	:	2

MAJOR ORDER ACTIONS, JUNE 1977

Suspension:

Middle Atlantic - June 10 (42 FR 29848, 6/10/77). This action suspends for the months of May through August 1977 the requirement that at least 50 percent of the receipts of milk at a pool plant be disposed of as Class I milk.
